DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the toggle being a tab lever, pull-to-unlock lever, and 2-position toggle switch must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. Claims 1, 10, and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 6 replace "a mounting nut" with –the mounting nut–.

In claim 10, line 8 replace "a mounting nut" with –the mounting nut–.

In claim 11, line 6 replace "a mounting nut" with –the mounting nut–.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 42-49 of copending Application No. 10/326,507. Although the conflicting claims are not identical, they are not patentably distinct from each other because while different language is utilized and there are additional features are claimed such as a switch cover having a plate and the bushing of the claimed invention, all of the claimed features of the present application are located within the claims 42-49 of application 10/326,507 and would inherently provide the method.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Razdow, Hults, Allison et al, Kirchoff, Aschenbach, Osika, and Levine et al teach various toggle switch structures and bushing connections.
